

Math 1232 Spring 2025  
Single-Variable Calculus 2  
Mastery Quiz 9  
Due Thursday, March 27

This week's mastery quiz has two topics. Everyone should submit M3. If you have a 2/2 on S7, you don't need to submit them again.

Don't worry if you make a minor error, but try to demonstrate your mastery of the underlying material. Feel free to consult your notes, but please **don't discuss the actual quiz questions with other students in the course.**

Remember that you are trying to demonstrate that you understand the concepts involved. For all these problems, justify your answers and explain how you reached them. Do not just write "yes" or "no" or give a single number.

Please turn this quiz in class on Wednesday. You may print this document out and write on it, or you may submit your work on separate paper; in either case make sure your name and recitation section are clearly on it. If you absolutely cannot turn it in in person, you can submit it electronically but this should be a last resort.

**Topics on This Quiz**

- Major Topic 3: Series Convergence
- Secondary Topic 7: Sequences and Series

**Name:**

**Recitation Section:**

**M3: Series Convergence**

- (a) Analyze the convergence of  $\sum_{n=1}^{\infty} \frac{\sin(1/n)}{n^2}$
- (b) Analyze the convergence of the series  $\sum_{n=2}^{\infty} \frac{n}{\ln(n)}$
- (c) Analyze the convergence of the series  $\sum_{n=1}^{\infty} \frac{4n^3 + 1}{n^4 + n + 3}$

**S7: Sequences and Series**

- (a) Let  $b_n = \frac{n!}{2^n}$ . Compute the first four terms of the sequence, and compute  $\lim_{n \rightarrow \infty} b_n$ , with justification.
- (b)  $\sum_{n=1}^{\infty} \ln \left( \frac{n+4}{n+3} \right) =$
- (c) Compute  $\sum_{n=1}^{\infty} \frac{4}{3^{2n}}$ .
